📄 PROFESSIONAL SUMMARY

Dynamic Operations Specialist with a multidisciplinary background in Fiduciary Accounting, Business Administration, and Management Information Systems. Proven track record of bridging the gap between financial oversight and technical infrastructure to drive operational excellence. Expert in Business Process Re-engineering, financial reporting, and deploying scalable IT solutions. A data-driven leader committed to strengthening internal controls and integrating cross-functional workflows to achieve enterprise-level objectives.

☆ EXECUTIVE CORE COMPETENCIES

- **Digital Strategy & Audience Growth:** Developed data-driven media campaigns and digital assets that secured a verifiable reach of 400K to 2M+ impressions per release. Successfully managed international stakeholder visibility across the Americas, Europe, and Oceania.
- **AI & Systems Architecture:** Engineered the structural logic and integration for proprietary AI-driven management platforms. Automated complex decision-making workflows for multinational teams, significantly reducing operational latency and improving resource allocation.
- **Technical Service Excellence:** Consistently outperformed institutional benchmarks at AppleCare by 200%, maintaining an 88% positive review rate for complex technical and financial inquiries. Recognized for elite-level proficiency in incident management and high-security data handling.
- **Full-Stack Development (MVP):** Expert in Swift (iOS) and Web Technologies (JS/Vue). Specialized in engineering scalable architectures and robust Minimum Viable Products (MVPs) for the startup ecosystem.
- **Fiduciary Oversight & Compliance:** Specialized in forensic auditing, complex billing reconciliation, and strict adherence to international accounting standards. Proven record of managing sensitive assets and proprietary data for high-profile entities under strict confidentiality.
- **Ethics & Confidentiality:** Extensive experience working under strict Non-Disclosure Agreements (NDAs); committed to the highest standards of data integrity and professional discretion.

📁 PROFESSIONAL EXPERIENCE

10/2023 – Present
Internationally

FREELANCE, SYSTEMS & OPERATIONS CONSULTANT

- **Full-Stack Web & Mobile Development:** Lead the end-to-end development of responsive websites and mobile applications using Swift, JavaScript, Vue.js, and CSS. Use Firebase for secure, real-time data handling, ensuring that proprietary startup data remained encrypted and compliant with international privacy standard. Manage version control and deployment workflows using GitHub and Visual Studio Code to deliver high-performance digital products.
- **Operations & Administrative Management:** Act as a strategic assistant for emerging ventures, coordinating small teams via Slack and Microsoft Teams. Streamline project schedules using Notion and Trello, facilitating meetings and producing detailed operational reports to ensure project milestones are met.
- **Digital Media & Brand Strategy:** Execute large-scale digital media campaigns across the Americas, Europe, and Oceania. Manage content ecosystems using Adobe Creative Cloud (Photoshop/Illustrator) and Canva, maintaining brand consistency and audience growth for high-profile individuals and startups.
- **Technical Systems Architecture:** Design the structural logic for integrated management platforms and AI-driven automation tools. Conduct root-cause analysis to resolve software bottlenecks, ensuring technical stacks align with executive productivity requirements.
- **Fiduciary & Business Consulting:** Provide specialized support in accounting and financial operations using QuickBooks and Excel. Assist clients with billing reconciliation, internal audits, and cash flow reporting while ensuring strict adherence to regulatory compliance standards.

03/2023 – 08/2023
Bogota D.C

TELEPERFORMANCE, APPLECARE ADVISOR

- **Technical Systems Diagnostics:** Provided tier-one and tier-two technical support for the Apple ecosystem across the Americas. Diagnosed complex operating system malfunctions across iOS, macOS, and visionOS. Utilized proprietary diagnostic tools to troubleshoot hardware-software integration and ensure immediate incident resolution.
- **Financial Operations & Account Security:** Managed high-security financial transactions and resolved complex billing discrepancies within Apple Media Services. Handled sensitive consumer data in strict accordance with GDPR and financial privacy standards to restore account integrity and service access.

04/2022 – 08/2022
Bogota D.C

GROUP A.S.D, GENERAL AGENT MILITARY HEALTH

- **Technical Service Coordination:** Acted as a specialized agent managing healthcare logistics and service requests for the Colombian Military, Air Force, Navy, and National Police. Handled high-volume clinical scheduling and resource requests through proprietary institutional software.
- **Incident & Case Management:** Resolved administrative bottlenecks and service discrepancies for military personnel, ensuring 100% adherence to strict service-level agreements (SLAs) and institutional KPIs.

TECHNICAL PROFICIENCIES & ECOSYSTEMS

Software Development & Systems Architecture

Languages & Frameworks: Swift (Xcode/iOS Development), JavaScript, HTML5, CSS3, Vue.js, Vibe, React and Web Frontend Architecture.

Systems & Infrastructure: AI Infrastructure Logic, Firebase, GitHub Version Control, and Backend-to-AI Integration.

Productivity & Design: Microsoft Office Suite, Adobe Creative Cloud, Canva, and Apple Professional Tools.

Research & Analytical Methodologies

Strategic Analysis: Institutional Governance, Historical Materialism, and Qualitative Research for organizational leadership.

Scientific & Philosophical Research: Theoretical Physics, Systematic Theology, and Ethology (Terrestrial and Marine Biology).

Aeronautical Sciences & Technical Systems

Aeronautical Sciences: Aerodynamics, Structural Mechanics, and Synoptic Meteorology.

Technical Maintenance: Avionics systems integration, propulsion system diagnostics, and Aeronautical Standard Operating Procedures (SOPs).

Languages
